23.   Problem: (use additional Sheets if necessary)
The ESDIS L3 Reconciliation Status Report for 5A and prior contains obsolete links of criteria to Level 3 requirements. Their presence in the database causes incorrect statusing of the Level 3 requirements.
The post-5B tickets in the VDB contain some criteria that are obsolete; their presence results in incorrect reporting of requirement status.

24. Proposed Solution: (use additional sheets if necessary)
See sheet 2. The Rationale columns in the attached tables explain the reason for each recommended action. Hard copy of relevant EVRs not already provided to ESDIS are attached: 1415, 1471, 1776, 1777, 1933, 1934, 1955, 1956, 65, 213, 221, 258, 373, 382, 472, 541, 685, 718, 838, 927, 1038, 1164, 1255, 543, 1042

25. Alternate Solution: (use additional sheets if necessary)

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)
Incorrect data will roll up into the L3 Comprehensive Status Report, which records the final status of ECS contractual requirements, and confuse verification of ECS requirements.

27. Justification for Emergency (If Block 15 is "Emergency"):
The routine CCR approval cycle is too long to support EOC L3 verification activities. Implemented CCRs are needed promptly in order to be available as timely input into succeeding steps for completion by EOC.
